Original Investigations

Upper and lower limb skin blood flow control mechanisms in essential hypertension
Ferhan Esen et al.; Eskişehir-Turkey

Ultrasonic score as an indicator of atherosclerosis’ clinical manifestations in hypertensives
Francesco Natale; Napoli-Italy

Editorial Comment: Doppler ultrasonography and hypertensive target organ damage
Akihiro Tojo; Tokyo-Japan

ABCA1 gene R219K variant in coronary disease risk through interactions with triglyceride elevation
Neslihan Çoban et al.; İstanbul-Turkey

“Low” serum asymmetric dimethylarginine is associated with fasting glucose and type-2 diabetes
Altan Onat et al.; İstanbul, Ankara, Diyarbakır-Turkey

Long-term prognosis of mild functional tricuspid regurgitation after mitral valve replacement
Mete Gürsoy et al.; İstanbul-Turkey

Myocardial bridging and risk factors for the coronary stenosis located proximally to bridge
Heng HONG et al.; Beijing-China

The relationship between gamma-glutamyltransferase and coronary collateral in chronic total occlusion
Müslüm Şahin et al.; İstanbul-Turkey

Relation of ABO blood groups to coronary lesion complexity in stable coronary artery disease
Ahmet Kaya et al.; Erzurum-Turkey

Location of paravalvular leakage and time to reoperation after mitral valve replacement
Mehmet Yanartaş et al.; İstanbul-Turkey

Predictive value of aortic knob width for postoperative atrial fibrillation in coronary artery surgery
Kemalettin Erdem et al.; Kahramanmaraş-Turkey

Review

Complete reverse remodeling in acute stress cardiomyopathy
Fatih Yağış et al; Baltimore-USA
The Anatolian Journal of Cardiology is the double-blind peer-reviewed, published in Turkish and English languages international open access periodical on cardiology. The Anatolian Journal of Cardiology is published 8 times per year (February, March, May, June, August, September, November and December).

The aim of the Anatolian Journal of Cardiology is to publish research articles on original issues of cardiology of the highest clinical and scientific quality at the international level. Along with this, it publishes reviews covering fundamental innovations and dealing with education, short editorial articles, original case reports and images, letters on experience relevant to broad cardiology issues and critiques, as well as issues on social cardiology.

The journal’s audience includes cardiologists, pediatric cardiologists, cardiovascular surgeons, internal medicine specialists, practitioners and specialists of all relevant disciplines.

The journal’s editorial and publishing process is adherent to standards of ICMJE, COPE, and HEART Group.

Copyright Transfer, Conflict of Interest Declaration and Authorship Contributions forms are available at www.anakarder.com.

The Anatolian Journal of Cardiology is indexed in Science Citation Index Expanded, Index Medicus/Medline/PubMed, EMBASE, Scopus, EMCare, CINAHL, Gale/Cengage Learning, EBSCO, DOAJ, ProQuest, Index Copernicus and Türkitk/Ulakbim Turkish Medical Database.

The funding sources of the journal are advertising and subscription.

Subscription information
The access to all full-text issues of the journal is free at www.anakarder.com. To subscribe to the print issues of the journal please fill the subscription form at www.anakarder.com and contact the Publisher.

Instructions for authors
Instructions for authors are published in the journal pages and could be accessed at the web site of the journal - www.anakarder.com

Material Disclaimer
Statements or opinions expressed in the manuscripts published in the Anatolian Journal of Cardiology reflect the views of the author(s) and not the opinions of the editors, the editorial board and the publisher; the editors, the editorial board and the publisher disclaim any responsibility or liability for such materials. The journal is printed on an acid-free paper.
1. Original research articles: Manuscript should not exceed 1000 words and should be accompanied by necessary number of tables and figures. Fifteen references seem to be enough for confidence.

1.1 Title page is the first page of the manuscript, which should be uploaded as separate PDF file. All authors' full names, affiliation, department, city, country, mobile and e-mail addresses should be included. The name of the first author should be noted by symbols. All address for correspondence contains full name of the first author or responsible authors, postal and e-mail addresses, and phone numbers. If the manuscript has been presented before, time and place of the conference should be declared.

1.2 Structured abstract: In Turkish language should not exceed 250 words and consists of no more than 60 characters. Checklists for clinical trials are mandatory. Results and Conclusion parts with subheadings and sub-subheadings. Main text should not exceed 1500 words and should be written in Times New Roman 12 font size. The text should be duplicated to persons who significantly contributed to the study or assisted in preparing the report should be done properly. The latter note should be sent in a separate file after the text of the study.

1.3 Statistical analysis should be performed in accordance with guidelines on reporting PRESENT in JBI Database (JBI DMOV and BMOV), and in the order of citation in the text. The comments for tables, diagrams and figures should be enough for confidence.

1.4 Main text includes Introduction, Methods, Results, Discussion, Study Limitations, and Conclusion. Each chapter should begin on a new page with a 12-point title. The number of pages should be limited to 20 in Turkish and 25 in English.

2.1 The rules for title page, references, figures and tables are applicable for all types of manuscripts.

2.2. Manuscripts should be submitted through the online manuscript submission system www.anadolukardiyolderg.com. You can find more information at www.anadolukardiyolderg.com.

2.3 Manuscript should be in English or Turkish language. The content of the historical notes should not contain subheadings and is limited by 900 words. Knowledge utilized in clinical applications, included in education academic level and confirmed by recent research results should be represented.

3. E-mail: btimur@ogu.edu.tr - info@anakarder.com

Editor in Chief: Professor Dr. Bilgin TIMURALP
Deputy Editors: Refik AYDINOV, Oya SARIKAYA-GÜNGÖR
Associate Editors: Murat ŞAHİTOĞLU, Mustafa ILGHİBÖİN, Refet EKİNazer, Orhan KALAČ, Zülfü KALE, Barbaros KAYA, Begüm KURU

Special Parts

2. Reviews: are prepared by authors or by invited authors. The manuscript should contain the results, discussion, conclusion, and updated knowledge on topic, intended to be used in clinic, and should define the perspectives for future research. An author should be an expert and have cited published works in the area of interest.

2.1 Unstructured abstract limited to 250 words is required. No more than 6 keywords are allowed. The acronym MAM and NJM.exp should be followed by the unstructured abstract. World counts is limited by 500 and references number is limited by 50.

3. Editorial: The type of article is a brief evaluation of published manuscripts by author(s) in the field of investigation. The table of contents describes the type of article. The page limit is 500 words and references number is limited by 50.

4. Case reports: Cases from diagnostic and educational point of view case reports, which are unusual, rare cases, outcomes are unknown, those one that usually diagnosed and managed with difficulties, and those cases which description is usually missing in clinical practice applications are published. Limited number of case reports is published. Articles accompanied by video/movie images have high priority for publishing. Case reports consist of introduction, case report, discussion and conclusion parts. Reference list and counter numbers are limited to 10 and 70 words, and no abstract is required.

5. Scientific letter: The articles in form of preliminary report aimed to announce the new research results concerning clinical or experimental scientific. The content of the scientific letter should not contain subheadings and is limited by 200 words. Original manuscripts are prepared according with the above mentioned rules and are published in electronic version only.

6. Letter to the Editor: Letter to the Editor is one of the main reasons for publication of this journal. It discuss the importance of the published manuscripts, their missing and significant facts and cases which should be shown to the journal. The requirement for the number of figures, tables and references is 10.

7. Education: Knowledge utilized in clinical applications, included in education academic level and confirmed by recent research results should be represented.

8. Original images: The impressive and rare images reflecting important findings based on clinical science, enlightening fundamental mechanisms of cardiovascular diseases, emphasizing anomalies, exemplifying new treatment methods are accepted for publication. Articles with accompanying video/movie images have high priority for publishing. The article includes the title, and figure legends (if necessary) should not exceed 200 words. Original images are prepared according with the above mentioned rules and are published in electronic version only.

9. Historical notes: The articles describing important historical events in cardiology (particularly for Turkey) and relevant disciplines, revealing new information on history of disease’s diagnosis and treatment. The new findings should be the result of a proper research work on the topic. The number of words for letter to the Editor is 500, the requirement for the number of figures and tables is not more than 10 and 70 words. The number of references is limited by 10.

10. Publication Ethics: The material published in the section of the journal includes articles, editorials, news, and views, the contemporary ethics and cases of ethics misconduct. The articles are limited by 1000 words and the number of references is limited by 50. For information on scientific and correspondence ethics, see the World Medical Association’s Declaration of Helsinki and the latest version on www.icmje.org.

EDITORIAL

To be rejected, citation from Bloomberg, accelerated Editor in Chief Office
Bilgin Timuralp; Eskişehir-Türkiye

ORIGINAL INVESTIGATIONS

Comparative study of the upper and lower limb skin blood flow control mechanisms in patients with essential hypertension
Ferhan Esen, Necmi Ata, Hamza Esen; Eskişehir-Turkey

Rapid ultrasound score as an indicator of atherosclerosis’ clinical manifestations in a population of hypertensives: the interrelationship between flow-mediated dilatation of brachial artery, carotid intima thickness, renal resistive index and retinal resistive index of central artery
Francesco Natale, Alessandro Ranieri, Alessandro Siciliano, Beniamino Casillo, Chiara Di Lorenzo, Chiara Granato, Chiara Cirillo, Claudia Concilio, Michele Adolfo Tedesco, Paolo Calabrò, Paolo Golino, Maria Giovanna Russo, Raffaele Calabrò; Naples-Italy

Editorial Comment: Doppler ultrasonography and hypertensive target organ damage
Akihiro Tojo; Tokyo-Japan

Gender specific association of ABCA1 gene R219K variant in coronary disease risk through interactions with serum triglyceride elevation in Turkish adults
Neslihan Çoban, Altan Onat, Evrim Kömürçü-Bayrak, Çağrı Güleç, Güney Can, Nihan Erginel-Ünaltuna; Istanbul-Turkey

Apparently “low” serum asymmetric dimethylarginine is associated with fasting glucose and tends toward association with type-2 diabetes
Altan Onat, Bayram Köröğlu, Güney Can, Ahmet Karagöz, Murat Yüksek, Mesut Aydın, İstanbul, Ankara; Diyarbakır-Turkey

Long-term prognosis of mild functional tricuspid regurgitation after mitral valve replacement
Mete Gürsoy, Vedat Bakuy, Ali Can Hatemi, Günsül Bulut, Kadiyre Kılıçkesmez, Nurhan Ince, Serdar Küçükoğlu; İstanbul-Turkey

Angiographically evident atherosclerotic stenosis associated with myocardial bridging and risk factors for the artery stenosis located proximally to myocardial bridging
Heng Hong, Ming-Sheng Wang, Qun Liu, Jing-Cheng Shi, Hai-Ming Ren, Zhi-Min Xu, Beijing; Changsha-China

The relationship between gamma-glutamyltransferase and coronary collateral circulation in patients with chronic total occlusion
Müslüm Şahin, Serdar Demir, Mehmet Emin Kalkan, Birol Özkan, Gökhan Alıcı, Kamil Cantûrk Çakalağaoglu, Mehmet Vefik Yazıcıoglu, Sabit Sarıkaya, Murat Biyaker, Mehmet Muhsin Türkmen; İstanbul-Turkey

Relation of ABO blood groups to coronary lesion complexity in patients with stable coronary artery disease
Ahmet Kaya, Ibrahim Halil Tanboğa, Mustafa Kurt, Turgay İşik, Yasemin Kaya, Zeki Yüksek Gûnaydın, Enbiya Aksakal, Ordu; Erzurum-Turkey

The relation between location of paravalvular leakage and time to reoperation after mitral valve replacement
Mehmet Yanartaş, Serdar Demir, Ayşe Baysal, Ali Fedakar, Elnur Alizade, Müslüm Şahin, Serpil Taş, Hasan Sunar; İstanbul-Turkey

Predictive value of aortic knob width for postoperative atrial fibrillation in coronary artery bypass surgery
Kemalettin Erdem, Serkan Öztürk, Selim Ayhan, Onursal Buğra, Orhan Bozdoğan, Ümit Yaşar Tekelioğlu, Mehmet Yazıcı, Bahadır Dağlar; Bolu, Kahramanmaraş-Turkey

REVIEW

Complete reverse remodeling in acute stress cardiomyopathy. Is preserved tissue contractility under stress related to reverse remodeling
Fatih Yalçın, Hülya Yalçın, Nagehan Küçükler, Theodore P. Abraham; Baltimore-USA

EDUCATION

Management of cardiac device infections according to current data
Habibe Kafes, Yeşim Güray, Esra Güçük İpek; Ankara-Turkey
